

TENDERFLAME

SAFE - COSY - GREEN
SAFE - COSY - GREEN

The
REVOLUTIONARY
FLAME

2025

Everybody loves the magic of a real-life flame, but traditional fuel sources like wood, gas, and bioethanol come with negative drawbacks. From harmful emissions and dangerous highly flammable liquids, to the complicated setups required for a nice fire. At Tenderflame, we've eliminated the issues and offer you:

The **REVOLUTIONARY** FLAME

Tenderflame is:

SAFE

Our Tenderfuel doesn't burn by itself, only in combination with our patented steel wick.

COSY

Create instant ambience through the comfort of a unique, real flame.

GREEN

Tenderflame burns clean and emits no soot or harmful emissions.

TENDERFUEL

Our Organic Tenderfuel is truly one-of-a-kind. Thanks to its high flashpoint, it doesn't ignite on its own. It only burns when combined with our patented steel wick, making it the safe alternative to the highly flammable and dangerous bioethanol.
